

# RMA

## Readiness Management Application

### ***WHAT IS THE READINESS MANAGEMENT APPLICATION?***

The Defense Supply Center Philadelphia's (DSCP's) Readiness Management Application (RMA) provides medical logistics situational awareness that enables DSCP to respond to Department of Defense (DOD) contingency requirements every day and in every crisis. By linking wholesale readiness-related data to commercial marketplace sales data, RMA allows stakeholders to collaborate and quickly resolve readiness challenges. RMA provides the tools to conduct supply and demand forecasting with improved data accuracy to the Services and the DSCP.

### ***WHAT ARE THE BENEFITS OF RMA?***

- ≡ Assesses the medical industrial base's ability to support the Services' medical requirements for specified timeframes for pharmaceutical and medical/surgical items.
- ≡ Compares commercial sales and sales trends to the Services' requirements to ensure planning is for the right items.
- ≡ Reduces acquisition and sustainment costs for medical materiel.
- ≡ Allows DOD to keep up with commercial medical advances for pharmaceuticals and medical/surgical materiel.
- ≡ Ties National Stock Numbers (NSNs) to commercial products.

### ***HIGHLIGHTS***

- ≡ Recommends the best commercial products to be associated to NSNs (Product of Choice).
- ≡ Shows commercial and Prime Vendor medical sales trends.
- ≡ Displays assembly components and allowances.
- ≡ Graphically displays go-to-war requirements.
- ≡ Shows materiel on contingency contracts and shares this information with the medical Electronic Catalog (ECAT) system.
- ≡ Shows equivalent commercial products and similar NSNs.
